

UG5 Agenda

September 30th, 2015

- FRN(s)
 - Review FRN assuming it is out.
 - One is approved, one still being reviewed by the lawyers. USPS wants to push these out together.
- 93 Redirection IMb (Documentation)
 - Update on redirection versus forwarding: Lisa / Kai
 - Notice to ACS customers that they'll get this data will go out soon.
- International Addressing
 - UPU S42 Project
 - Kai: I reviewed the latest version of the project. The NCSC rep who used to work with UPU retired, so trying to discover who is assigned. Has some samples, looking for a label format. Might have examples as early as next meeting.
- Updating Address Quality Best Practices
 - Form a Workgroup?
 - ChrisL: it makes sense to do so. Dan: I'll get that set up.

ality.pdf

- PCC UAA Webinar (Ellie Alexander)
 - 3 volunteers
 - Looking for an additional 1-2 people to give input on the impact of UAA in different areas. If you're interested, contact Dan or Ellie. Hoping to schedule for November.
- NCOALink PAF
 - PO Box vs Physical Address
 - PO Boxes haven't been allowed on a PAF since the start of NCOALink. A Licensee announcement was sent around 2 weeks ago. After looking at the data, there were

quite a few PO Boxes on PAFs. Some foreign companies had presented a PO Box as well. The GAO wants USPS to demonstrate that they can find everyone who gets NCOA data. PAF data needs to be archived for 6 years, and PO Boxes and private mail boxes are not allowed.

- WG 171: Adam / Kai
 - Update
 - Next meeting is next week, will review and ensure the recommendations are wrapped up. On target to close by next MTAC.
- Colleges & Universities: Thom / Dennis K
 - On hold
 - No updates
- 100 record rule
 - The legal team is busy with end of year activity. Might have an update next time. Still looking for conceptual alternatives.
- MikeT
 - Doc on Full-service says a mailing over 75% FS should get free ACS on the non-FS portion of that mailing. When should that happen? Kai: This should be covered in the new FRN.
